

**Our solutions keep you moving—**  
**like never before**

# Welcome

---

# Company introduction

---

Welcome to MOOV Fuel and Lubricants. Whether your business requires commercial or retail energy solutions, our team of experts are ready to advise on what you need. With over 65 years of experience in the petrochemical sector, we are fully committed to supplying and delivering the highest quality fuel, lubricant and LPG products safely and responsibly to business, industry, and agriculture across South Africa.

Our recent bolt-on acquisition of Bachmus Oil & Fuel Supplies also allows us to cater to more SADEC countries, including Botswana, Zambia, Zimbabwe, and Mozambique.

Experience energy—like never before!

# Why Choose Us

## Long-term partners

We've served as a reliable South African energy partner for over 65 years and believe in investing in partnerships for the long haul.

## Competitive pricing

You can trust our team to provide your business with industry-leading service and quality at competitive prices.

## Large logistics fleet

Our logistics fleet consists of fuel tankers with an average delivery capacity of 38 000 litres, ensuring that we can deliver quality fuel to your site.

## Efficient service

We offer a turnaround time of 24-48 hours for delivery across South Africa (dependent on your drop-off point and the nearest terminal).

## Ahead of the curve

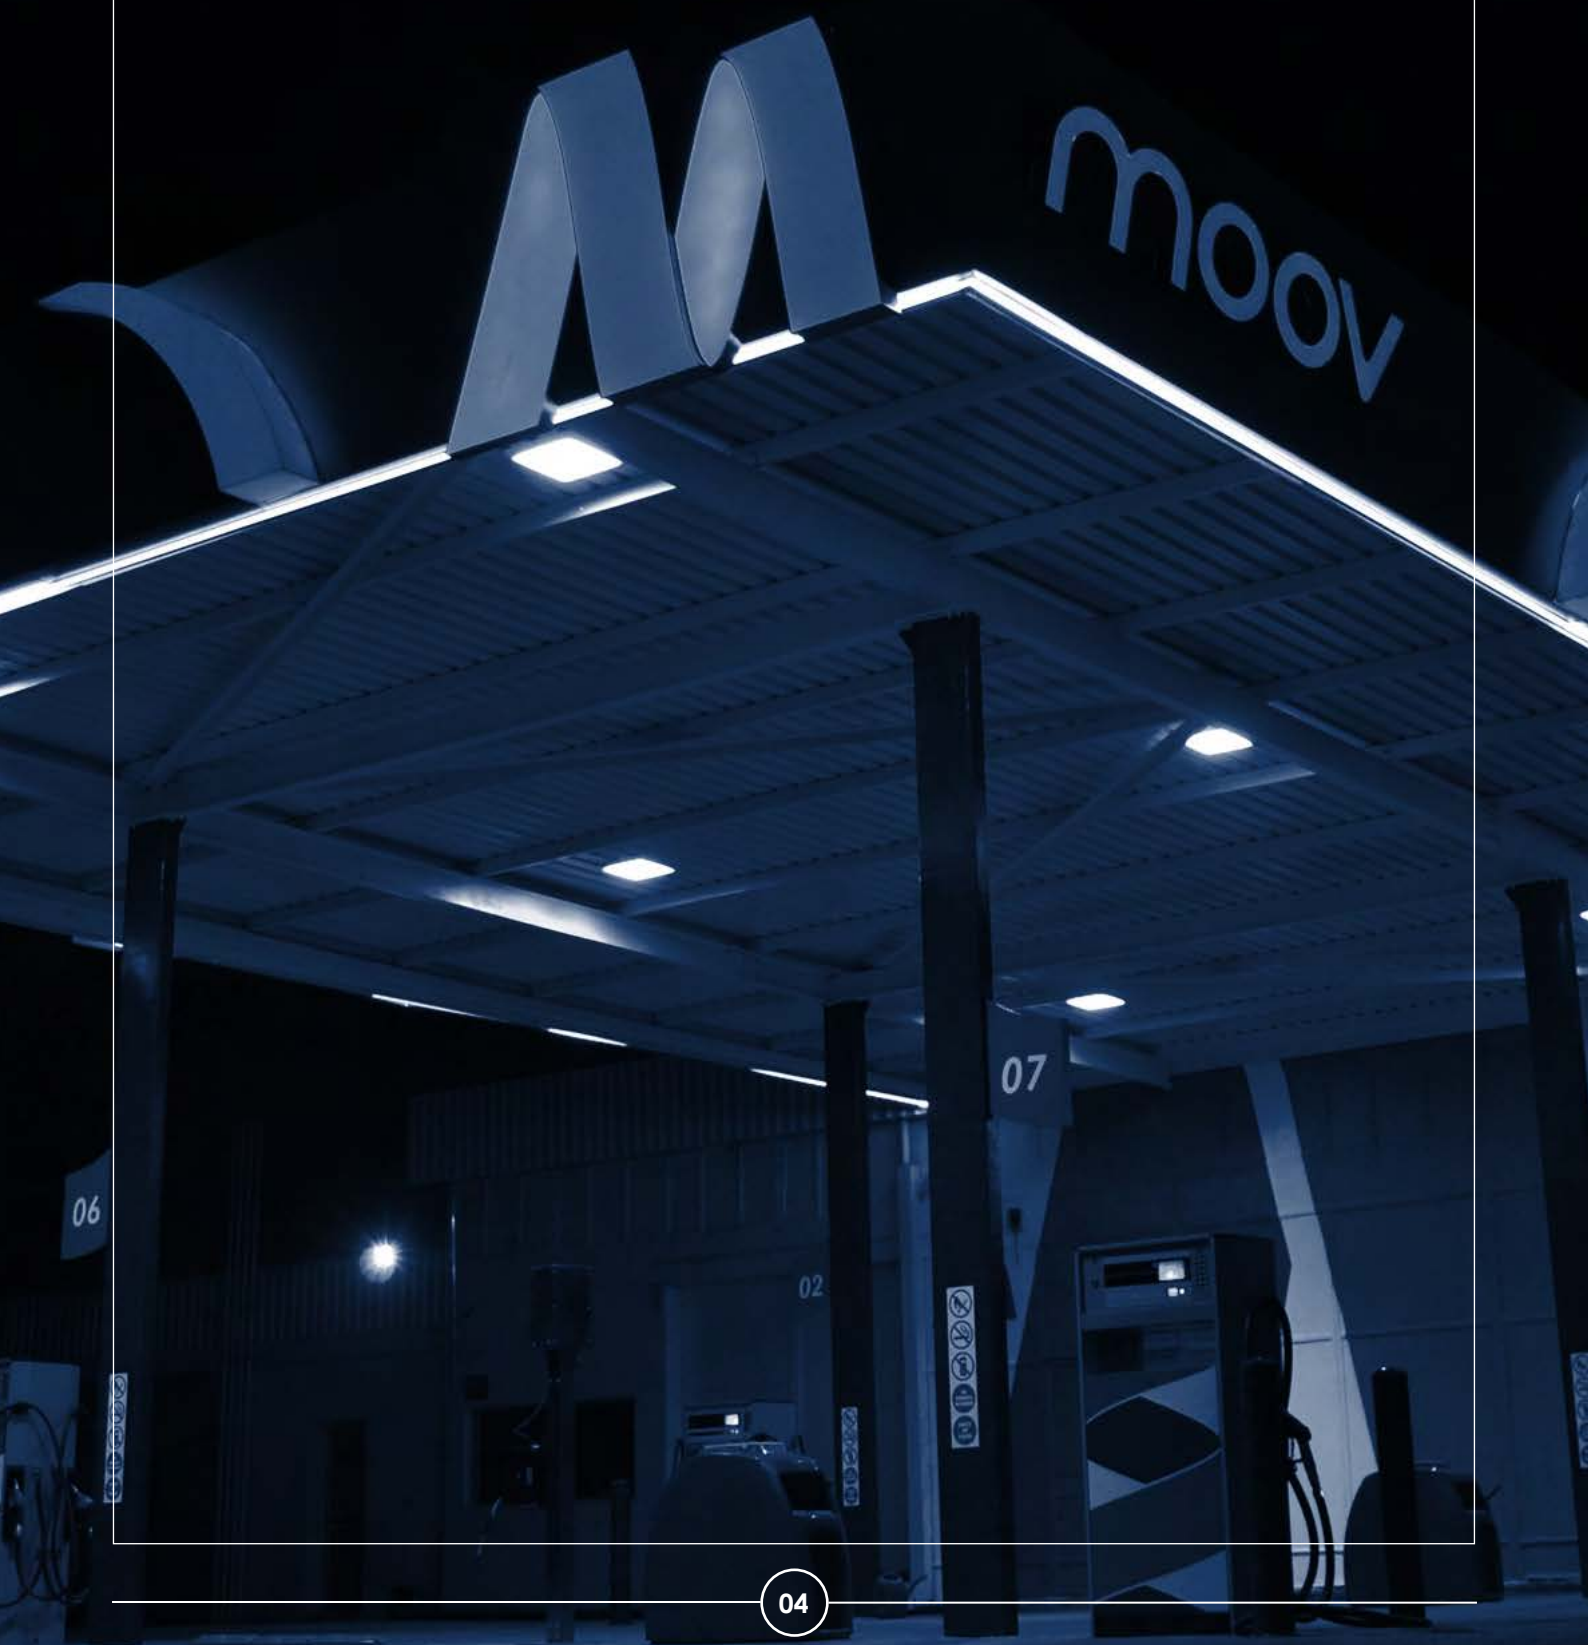

We pride ourselves on staying ahead of the curve in our product and service offerings. We utilise the latest technology to help keep our customers informed and impressed.

## B-BBEE partners

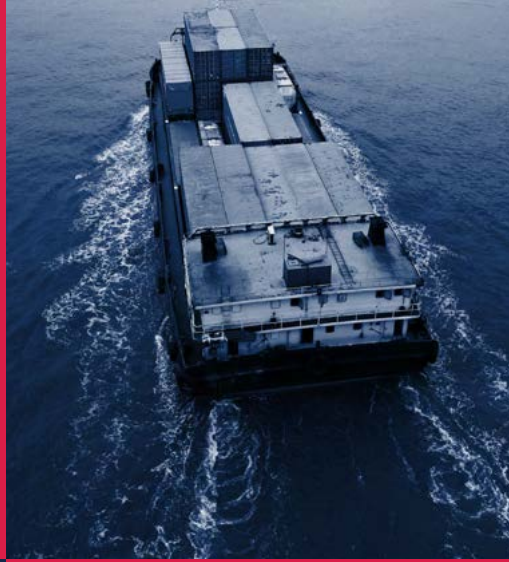

We offer a level 4 B-BBEE status, as well as a 100% B-BBEE Procurement Recognition Level.

# Our promise

---

You can rely on our team to be accountable for their actions. We deliver results of the highest quality, in good time.

We take pride in being able to provide much more than our recommended range of products. Our team of experts hold numerous years of experience in the energy sector and will always go the extra mile in trying to identify how we can make our clients business operations more productive and efficient.

We are an innovative and diverse team of action, who thrive in a fast-paced environment. It's one of the main ways that we keep our clients MOOVing forward—wherever they are.

We're proud to be able to assure our clients that we prioritise safety in every action we take and every decision we make.

All of our bulk storage and distribution centres conduct comprehensive internal and external audits, while health and safety evaluations are also performed at service stations every year.

Before joining our team, our bulk vehicle operators have to pass a strict selection process and must be in possession of a Code EC drivers licence with Dangerous Goods, PrDP and Hazchem classification—certifying that they are as committed to your safety as we are.

# Our vision

---

We aim to meet Africa's  
energy needs through  
safe reliable service.

# Commercial solutions

## Petroleum

We offer bulk Petroleum delivery and storage of ULP 95.

## Diesel

We offer bulk delivery and storage of Diesel 10ppm and 50ppm, on road and off Diesel road products, as well as Diesel Additives.

We also provide customers with the best on-road Diesel solution. This service acts as a real-time management solution for all your on-road refuelling and driver spend needs.

## LPG

We specialise in all commercial, residential and industrial LPG supply.

# Lubricant offering and technical abilities

---

## Products

We're proud to offer our clients a complete product Bumper to Bumper offering, including Minerals, Synthetics, Food-Grades, Biodegradables and AdBlue.

## Services

In addition to our recommended range of products, we also offer our clients the following services:

- Oil analysis.
- Equipment monitoring.
- Lubrication surveys.

## Technical support and training

Our technical experts have the necessary expertise to recommend suitable products and assist with optimum equipment maintenance for reliability of operation.

We also provide training support on product use and handling to ensure that your machinery is never compromised.

# Warehouse offering

---

We have our own lubricant distribution centre in Kraaifontein from which we service our customers throughout the Western Cape, Boland, Overberg, Southern Cape and Northern Cape. Apart from our warehouse in Cape Town, we also service lubricant clients in Gauteng and KZN (including the export market). In addition to South Africa, we also have warehousing and distribution facilities in Walvis Bay, Namibia.

# Fuel & Lubricant management systems

---

Our fuel and lubricant management systems consist of a combination of hardware and software products, that enable access, security and control of product stores, while monitoring delivery and consumption.

Automatic tank level management assists our customers with real-time data on how to manage the product in their tanks or mobile units. This data can be anything from a price increase or decrease, to cash flow or wet stock control. Through electronic automatic tank gauging, we are able to set notifications that send SMSes or emails to our customers, notifying them that their fuel or lubricant levels are running low.

Our fuel tankers are designed to transport petrol & diesel and are equipped with hoses, nozzles and pumps to cater for a multitude of customer specific delivery requirements. We also have various truck and trailer combinations, which provide us with the flexibility to adapt to our customers' requirements. Our clients can also have peace of mind in knowing that our fuel tankers are manufactured in accordance with SABS specifications, as well as the National Road Traffic Act.

Self bunded tanks refer to transportable bulk tank storage and handling of Diesel, Petroleum, and lubricants that are equipped with a pump/meter and filter. Our diverse range of innovative and environmentally responsible steel storage solutions offer dispensing and management systems in capacities ranging from 200 to 100,000 litres.

Our fuel and lubricant dispensing units refer to fuel pumps and grease pneumatic pumps. By providing our customers with the right equipment we are able to help eliminate risk of contamination and ensure that their storage complies with the correct HSSE standards.

# Our industries

---

We offer fuel and lubricant solutions for a variety of different industries, which are introduced in the pages to follow.

# Retail forecourts

---

At MOOV Retail, our biggest asset is our customers and retailers. Building strong relationships and always putting the customer first forms part of our core values. We understand the frustrations and challenges that fuel retailers face on a day-to-day basis—as they try and balance legislative and industry standards, along with the threat of declining volumes and profits. As your fuel and lubricant partner, we can help to alleviate common frustrations that other suppliers often overlook.

We see ourselves as industry leaders within the Petroleum industry, through effectively delivering product to our retailers and offering digital fuel management solutions. We are currently servicing 86 filling stations all over the Western Cape, which includes sustainable fuel delivery, marketing, training, strategic growth opportunities and infrastructure development. Whether you are a small service station located in a close-knit rural community or a large truck stop located on a bustling national highway, we're able to assist.

## Product offering:

- Petrol ULP 95
- Diesel 50ppm

We also offer retailers the benefit of a digital fuel management system, which provides numerous reports based on past and current data. This system also assists with forecasting, ordering quantities, wet stocks and stock on hand.

# Our partners

---

# Retail convenience offering

---

At MOOV Fuel, we understand that visiting a service station is no longer just about fuel sales, as consumers are choosing to shop in c-stores for their own convenience. Customers appreciate being able to pick up supplies, including groceries, household goods, health food, and fast food, in an accessible location. We're proud to partner with the following brands in this regard:

# Transport & Logistics

---

Keep your trucks fuelled up and lubricated. Our on-site delivery options provide an efficient and economical solution to common inconveniences. Our team can drive to your location and refuel your storage tanks—wherever they are.

Through real-time reporting, our team can also track your fuel usage for accurate billing. Whether you run a large, heavy-duty trucking operation or manage a smaller logistics fleet, our team of energy experts can help you gain timely, convenient access to the fuel you need to keep your business MOOVing forward.

# Agriculture

Regardless of the nature of your agribusiness: planting, growing, feeding and harvesting all require different fuel and lubricant solutions—that's why you need a trusted supplier to provide you with the services and supplies you need exactly when you need them. From on-site fuel tank delivery to lubricants for maintenance, you'll never need to worry about your farm's energy needs ever again.

We also understand that your farm's fuel requirements fluctuate with the seasons—that's why we offer flexible service contracts to suit your agribusiness and your budget. In addition to on-site refuelling, we also offer remote tank volume monitoring to keep an eye on your fuel levels. We'll know exactly when you need refuelling and get in touch to schedule a delivery as soon as possible.

# Mining

---

We understand the unique challenges facing our continent's mining industry and are equipped to cater to the sector's energy needs proficiently and effectively.

Reducing your mine's fuel costs starts with the right fuel storage systems. Whether you require a small mobile fuel storage tank or a large-scale bulk fuel solution, our team of energy experts have the knowledge to help you make the most of the fuel that keeps your mine running. Our recommended range of self-bunded tanks are a portable, cost-effective and reliable fuel storage solution for the mining industry. Simply drop the tank at the site and your operations can commence within hours, without any hassles.

We also understand that your mine's operating environment poses unique challenges for your energy requirements. In conditions where fluctuating temperatures, dust and dirt pose significant risks, it is also important to have high performance lubrication to protect your equipment.

# Forestry

Across Africa, responsible forestry requires attention to sustainable and effective practices that have the lowest environmental impact and yield the greatest social and economic benefit. We can supply your forestry business with a diverse range of lubricants to assist your chainsaws, harvesters, shredders, forestry tractors, skidders and much more.

In addition—it doesn't matter how big or small your forestry fuel needs are—we have the capacity to make sure your operation runs efficiently. Our team can refuel your equipment while it sits idle overnight, which means production doesn't have to stop for day-time refuelling. We work with businesses of all shapes and sizes to deliver efficient, professional on-site refuelling and bulk fuel supply services across a wide variety of projects.

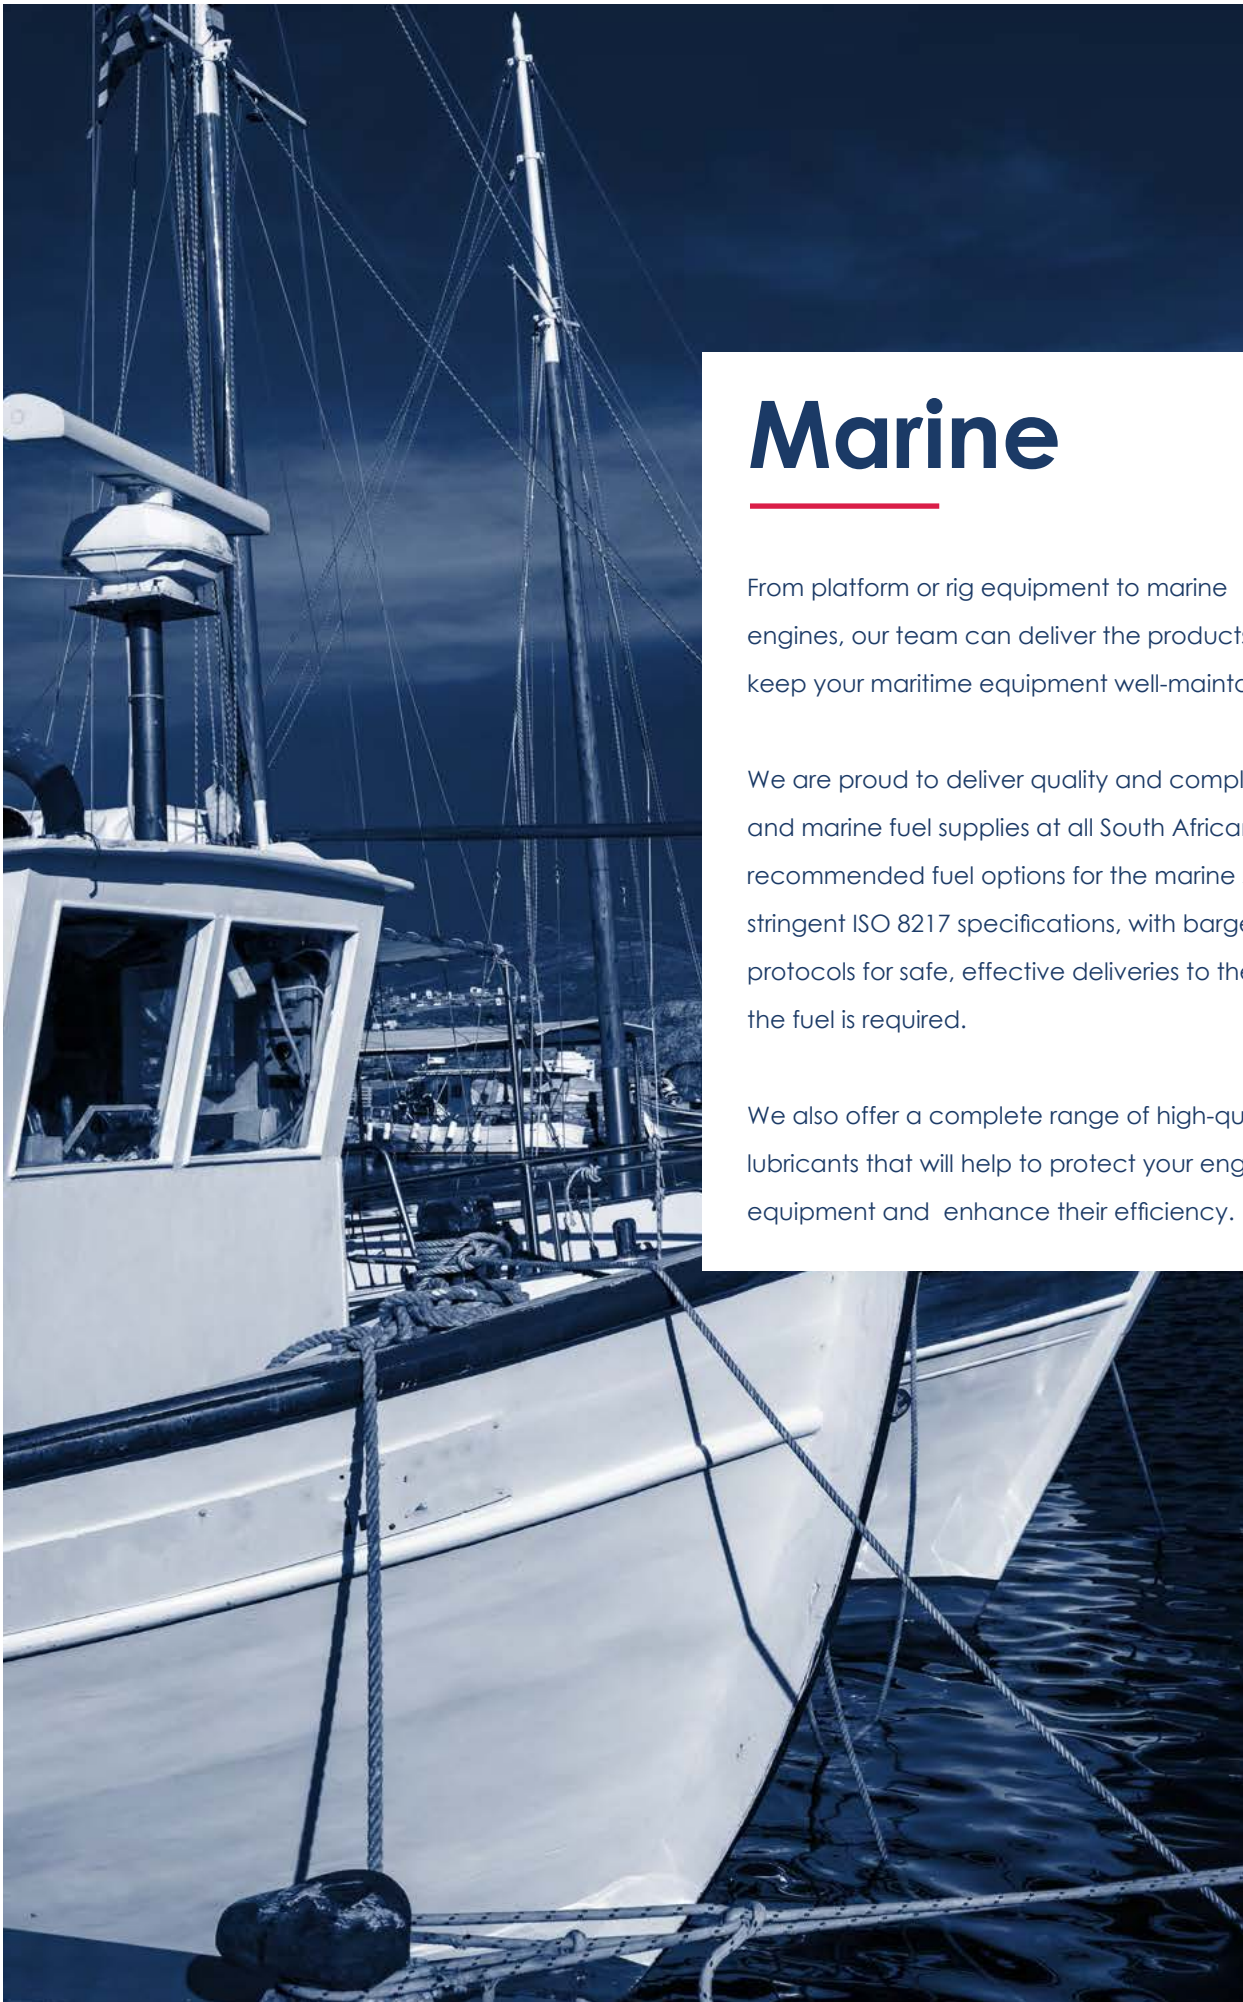

# Construction

---

Our team of energy experts strive to make it as easy as possible to keep your construction equipment well-maintained and fuelled up. From on-site fuel tank delivery to lubricants for maintenance, we have you covered.

Good lubrication of your construction equipment is vital to your operations, as it ensures reduced maintenance, optimised operating costs and an extended lifetime for your equipment. Trust us on this—although it may be tempting to reduce your operating costs by using cheaper products, the long-term risks are high. While inferior lubricants won't cause immediate equipment breakdowns, they can lead to significant maintenance expenses over time. We can provide you with lubricants that will benefit your business in the long run.

# Marine

From platform or rig equipment to marine engines, our team can deliver the products you need to keep your maritime equipment well-maintained.

We are proud to deliver quality and compliant bunker and marine fuel supplies at all South African ports. All our recommended fuel options for the marine sector meet stringent ISO 8217 specifications, with barge inspection protocols for safe, effective deliveries to the port where the fuel is required.

We also offer a complete range of high-quality marine lubricants that will help to protect your engines and equipment and enhance their efficiency.

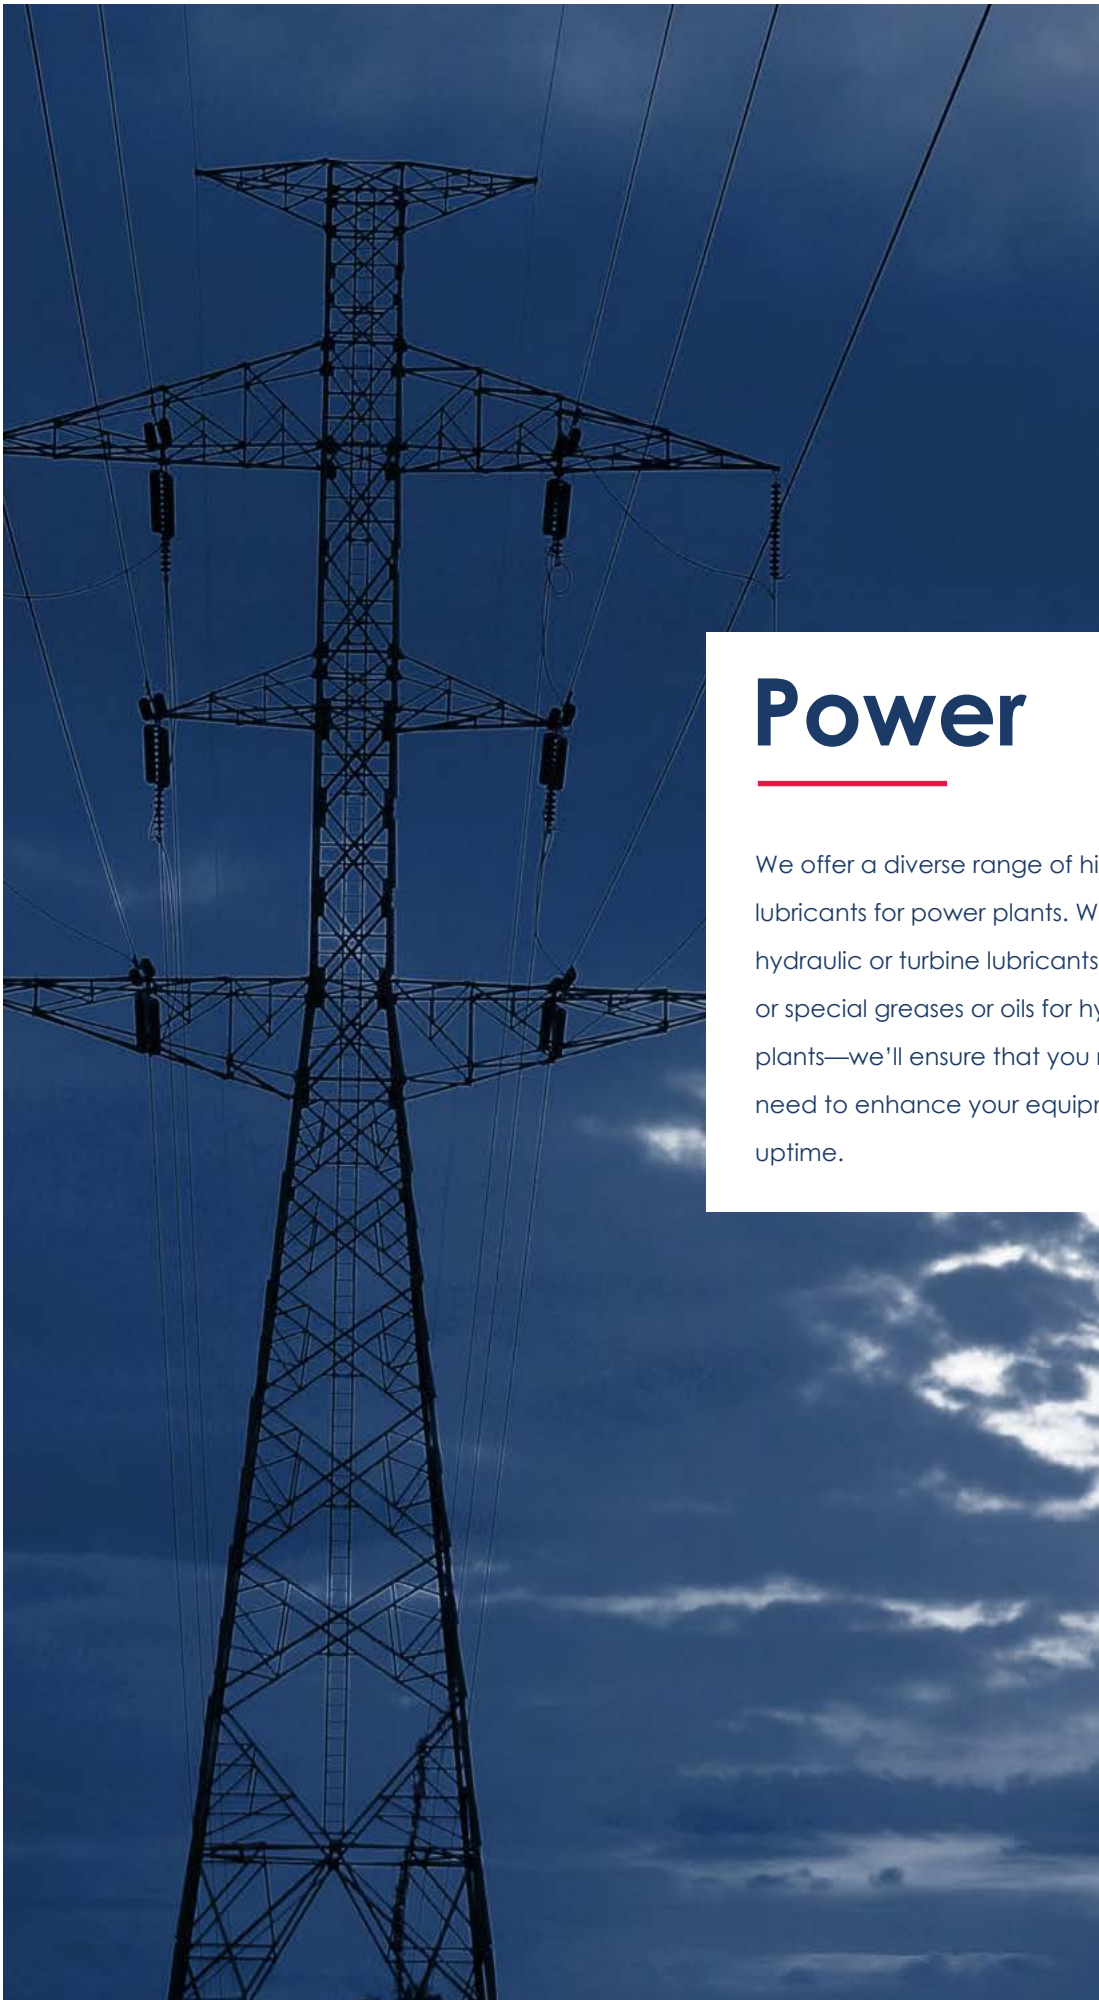

# Manufacturing

---

From forklifts to automated machinery, our team works with you to make sure your operation never misses a beat. Schedule a site assessment to maximise your operation's safety, productivity, and environmental consideration.

With our oil analysis services, our team of experts can also help you plan the best lubrication and cleaning cycle to ensure that there are no unnecessary interruptions in your production processes.

# Power

---

We offer a diverse range of high-quality dedicated lubricants for power plants. Whether you require hydraulic or turbine lubricants for coal-fired power plants or special greases or oils for hydro and wind power plants—we'll ensure that you receive the products you need to enhance your equipment's reliability and uptime.

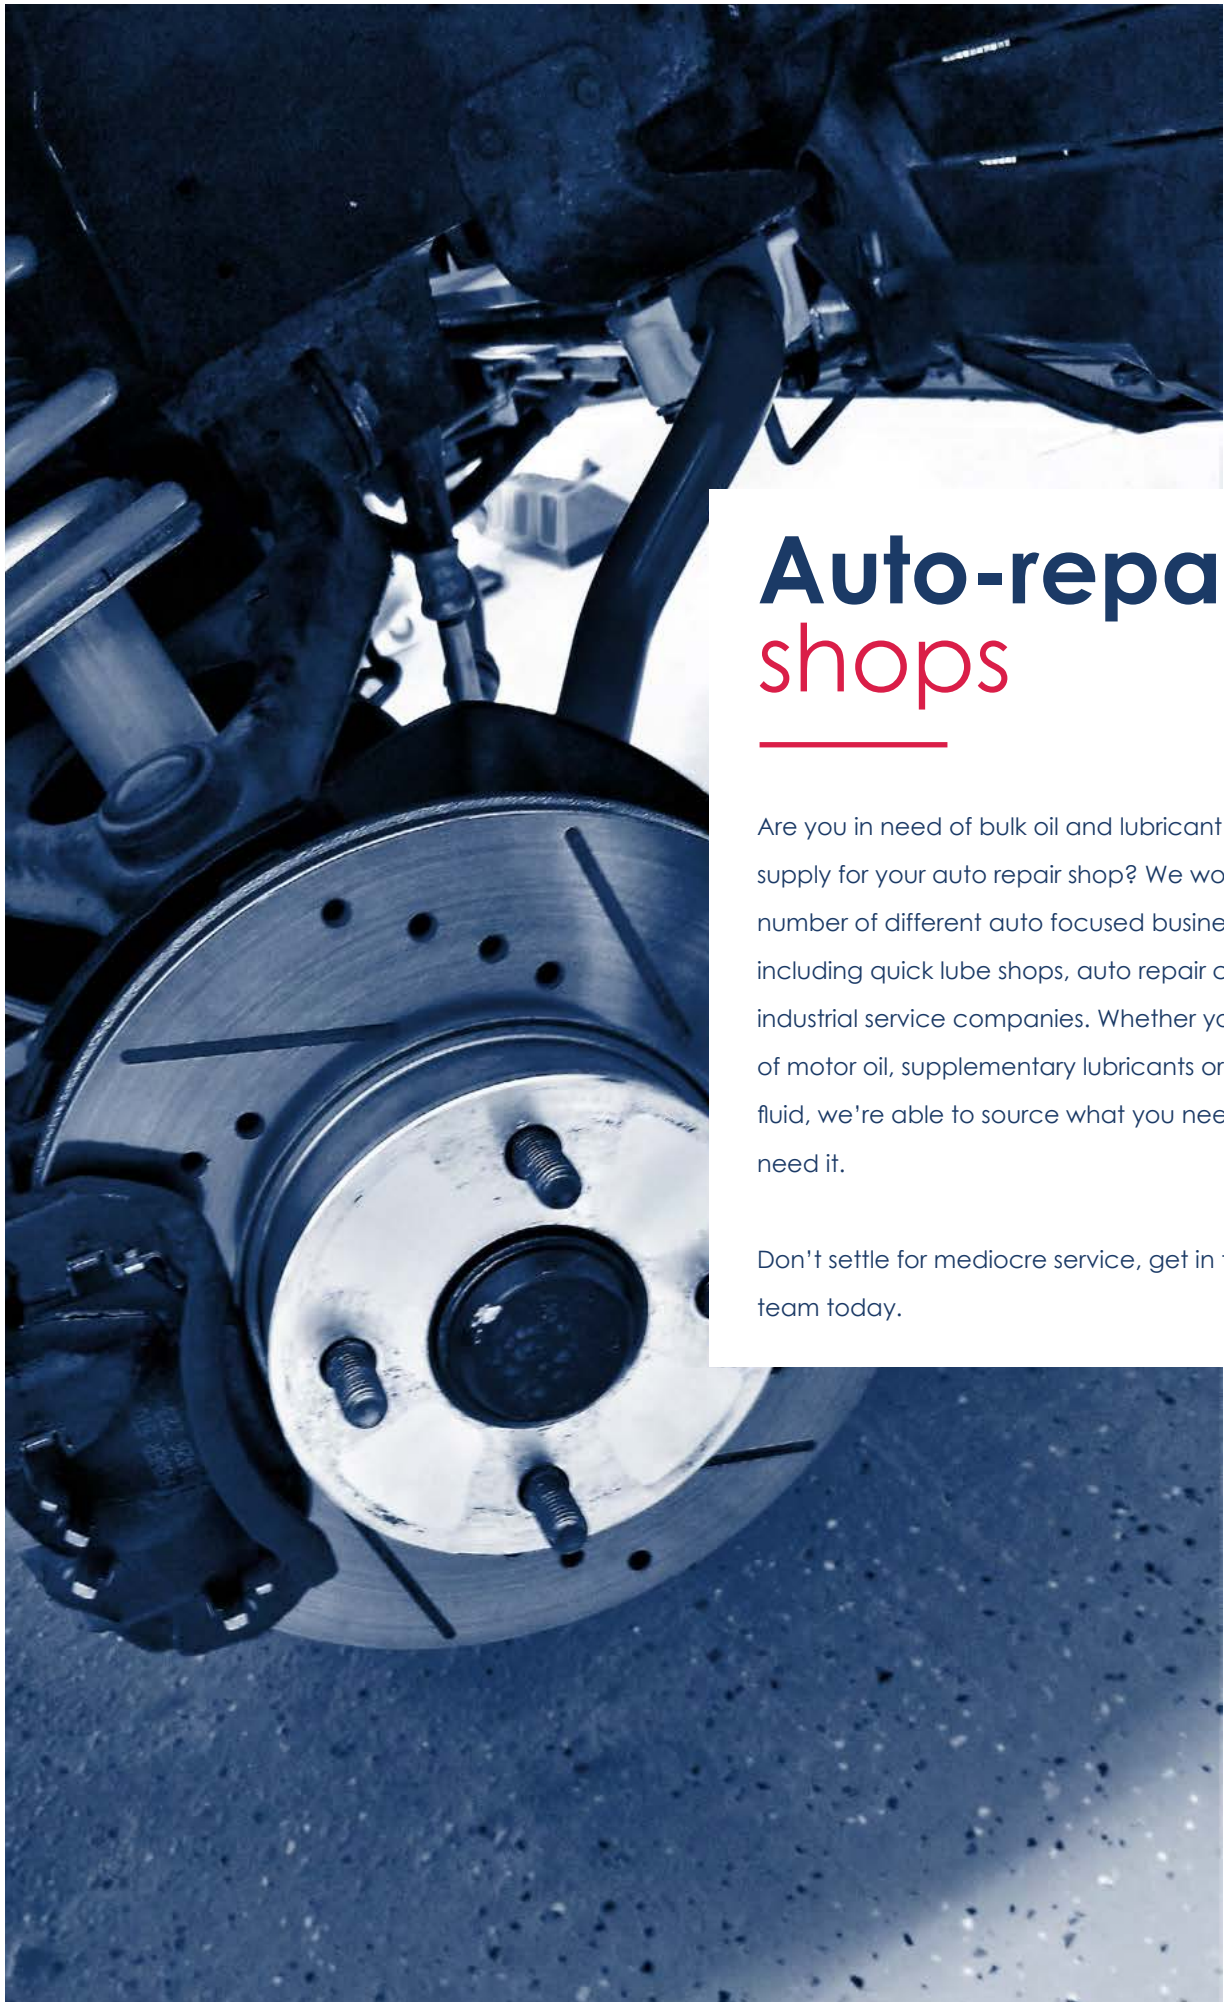

## Food & Beverage

---

Food safety is a critical factor in the success of the FMCG industry. Contamination of your products is not only costly, but can also endanger the health of consumers, leading to significant loss of reputation. An effective approach to maintaining food safety is to use high-quality, food-grade lubricants.

Our recommended range of lubricants are NSF H1 certified, do not contain natural products derived from animals or genetically modified organisms, are suitable for use where vegetarian and nut free food is prepared, help prolong equipment life, improve equipment performance, lower maintenance costs and also reduce overall consumption and waste.

Our product solutions coupled with individual consultation, can help you boost your productivity.

## Auto-repair shops

---

Are you in need of bulk oil and lubricant supply for your auto repair shop? We work with a number of different auto focused businesses including quick lube shops, auto repair centers and industrial service companies. Whether you're in need of motor oil, supplementary lubricants or diesel exhaust fluid, we're able to source what you need, when you need it.

Don't settle for mediocre service, get in touch with our team today.
